Summary

I am a Senior Full Stack Software Engineer and over my 8 year career I have grown my technical and management skills and gained experience in large corporations and small start-ups. Big data has always been at the centre of my experience, from data analytics to support key regulatory requirements in the banking world or data processing and analysis in retail to drive e-commerce personalisation. Recently, I have focused on data activation and enabling the use of data through application services, building some of the latest retail personalisation applications for health and wellness.

Experience

Foodmaestro • Engineering Team Lead • Feb 2018 - Present (2 years 7 months +)

As an Engineering Team Lead I managed a small team of developers to develop new customer facing applications, lead customer integrations and mentor his team to become better than they were yesterday.

- Instrumental in building our company culture and core development team
- Designed and built cloud infrastructure to store and serve our data (Azure, SQL, VM)
- Determined scope and breaking down complex features and requirements into tickets (JIRA)
- Building new API endpoints to be consumed by Retailer Frontends (JS/Node.js)
- Maintained Existing Infrastructure for Mobile apps
- Collaborating with Retailers in the UK and Canada to integrate our services

Scotiabank • Senior Programmer • Jul 2014 - Feb 2018 (3 years 8 months)

As part of the Business Intelligence Center of Excellence I was responsible for helping business lines determine the best approach for their business intelligence projects and plans. By giving them the tools and training to better manage their self-service analytics and reporting visions.

- Designed and developed a reporting portal for executive report consumption
- Built reports in the reporting portal for different business lines
- Transitioned to a business customer focus position
- Training business customers on the Tableau platform
- Managing Tableau Server infrastructure

Scotiabank • System Programmer • Jan 2012 Jul 2014 (2 years 7 months)

As a System programmer I was mainly tasked with creating businesses reporting dreams a reality. I was also apart of creating new ways for business lines to consume those reports through our in-house social network.

- Created websites into mobile apps and distributed in house
- Worked with Cognos Reporting tools to create ad hoc reports
- Designed and prototyped an in-house social networking site. (The other half of the mobile app)
- Applied Agile project management style for software development
- Managed MS SQL stored procedures for reporting purposes

Arcline (2000) • Inc.Junior Programmer • May 2011 - Aug 2011 (4 months)

As a Junior programmer at Arcline (2000) I was mainly responsible for maintaining the current version of the software, shipping new versions to customers, and customer support.

- Worked with Visual Fox Pro to maintain the Version 2 of the software built in the early 2000's
- Built new features such as Invoicing Reports, and new Pick and Drop features
- Used Visual Source Safe for a code repository
- Gave input Version 3 of the software as what feature were important to customers
- Learned of technical terms used in the trucking industry.

Education

Georgian College • 2010 - 2013

Computer Programmer Analyst, Computer Science
